

ACETAPROFEN *Suspension*

Analgesic – Antipyretic & Anti-inflammatory

Composition:

Each teaspoonful (5ml) contains:

- Ibuprofen 100 mg.
- Paracetamol 125 mg.

Acetaprofen is a combination of two well established effective, and safe drugs. Paracetamol is an analgesic antipyretic drug. It may act by inhibiting prostaglandin synthesis in the CNS and through peripheral action by blocking pain impulse generation.

It produces antipyresis by acting on the heat regulating center.

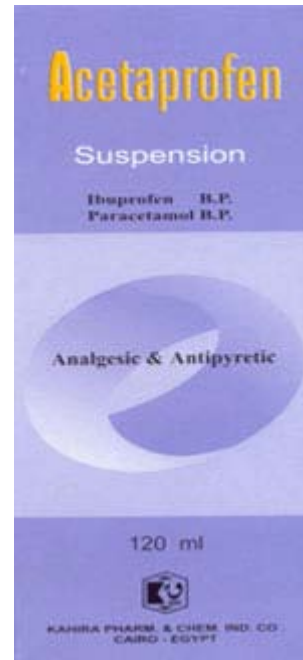

Indications:

- Reduction of fever in most febrile conditions.
- In the treatment of minor aches and pains such as headaches, toothache, muscular aches, backaches and pain due to inflammation.

Dosage:

- Under 2 years : consult your physician.
- Above 2 years : 1/2 teaspoonful 3 times daily.
- Above 6 years : 1 teaspoonful 3 times daily.

Packing:

Bottles of 100 ml.
