

PHOSPHOPLEX- C Syrup

Composition:

Each 100 ml contains:

- Thiamine HCL [Vitamin B 1] 80 mg.
- Riboflavine [Vitamin B 2] 8 mg .
- Pyridoxine [Vitamin B 6] 25 mg .
- Nicotinamide 250 mg .
- Calcium Pantothenate 25 mg .
- Ascorbic Acid 1.5 gm.

Properties:

PHOSPHOPLEX - C is a tonic syrup which contains the essential components of vitamin B complex, and vitamin C. These vitamins are involved in many important enzyme systems which are essential for the vitality and growth of the body. Thiamine acts as co-enzyme in carbohydrate, fat and protein metabolism. It is necessary for growth, fertility and normal function of the nervous tissues . Riboflavine is an essential component of certain oxidative enzyme systems. Pyridoxine acts as co-enzyme essential in the metabolism of many amino acids and the essential unsaturated fatty acids. Pyridoxine plays a role in the antibodies formation together with Calcium pantothenate which is essential for both carbohydrate and fat metabolism. Nicotinamide is an essential part of co-enzyme 1 and 2. Ascorbic acid plays a part in intracellular oxidation reduction system. It is necessary for formation of ground substance, maturation of red blood corpuscles and proper function of adrenal cortex particularly in cases of stress.

Indications & Usage:

Anorexia, overwork and mental exhaustion, Neurasthenia, Convalescence, Vitamin B Complex deficiency, also in association with antibiotics and sulphonamides.

Dosage & Administration:

Children : One teaspoonful three times daily before meals.
