

PRISOLINE *Eye & Nasal Drops*

Decongestant – Antiallergic

Composition:

Each 100 ml contains:

- Naphazoline HCl 50 mg.
- Chlorpheniramine Maleate 50 mg.
- Isotonic – buffered solution ad 100 ml.

Properties:

PRISOLINE produces a rapid and prolonged decongestant of the nasal mucosa and conjunctiva and provides marked relief of excessive lacrimation , photophobia , repeated sneezing , rhinorrhoea and other symptoms of allergy or irritation of the nose and / or eye.

The effects produced by PRISOLINE are due to the combined action by Naphazoline Hydrochloride , the sympathomimetic with pronounced vasoconstrictor effect and Chlorpheniramine Maleate , the potent antihistaminic which has also a local anaesthetic action.

Indications & Usage:

- Nasal indications:
 - Allergic and vasomotor rhinitis.
 - As decongestant in common cold , influenza , sinusitis , otitis media , etc .
- Ophthalmic indications:
