

PYRAMINE *Tablets*

Vitamins B1 & B6.

Composition:

- Vitamin B1 250 mg.
- Vitamin B6 250 mg.

Properties:

Vitamin B1 acts as essential coenzyme in carbohydrate metabolism and also has a role in conversion of tryptophan into nicotinamide. Its deficiency is associated with peripheral sensory disturbances, mental changes, weakness of skeletal and cardiac muscles and gastrointestinal disturbances.

Vitamin B6 acts as a coenzyme in protein, fat, and carbohydrate metabolism, aids in transformation of energy in brain and nerve cells, reduces oxalate production through its action on glycine metabolism, stimulates haem production, and also has been found to be useful in treatment of vomiting due to pregnancy and radiation sickness, and in management of some skin neuromuscular disorders.

Indications:

Peripheral neuritis due to:

- Diabetes, anaemia, pregnancy, infections, alcoholism, etc.
- Drug – induced e.g. due to isoniazid, contraceptive pills, Chloramphenicol ,etc.
- To prevent optic neuritis induced by Chloramphenicol.
- Trigeminal neuralgia.
- Vomiting of pregnancy and radiation sickness Primary hyperoxaluria.
- As adjuvant in treatment of heart failure.

- Pyridoxine dependant anaemia.
- Agranulocytosis.
- Mental and physical exhaustion.
- As adjuvant in management of seborrhoeic dermatitis and other dermatoses.

Dosage:

1 – 3 tablets daily according to the condition.

Packing:

Containers of 20 tablets.
