

SCALPINE *Suspension*

Topical treatment for Dandruff & Tinea versicolor.

Composition:

- Selenium disulphide 2.5%

Indications & Mode of Use:

1 - Treatment of Dandruff.

- The hair is to be washed as usual with water and soap or shampoo.
- The bottle is shaken well, and the wet scalp is massaged with 1-- 2 teaspoonfuls of the suspension which is allowed to remain for 2 - 3 minutes, and the scalp is then rinsed with water.
- The application is repeated, and finally the scalp is rinsed thoroughly with water.
- Therapy is started by 2 applications every week for 2 weeks, then the frequency is reduced to 1 application every week, every 2 weeks, or every 3-4 weeks, according to the condition.

2 - Treatment of Tinea versicolor:

- The bottle is shaken well, and the suspension is applied on the affected area and allowed to dry, then rubbed into a lather, and finally washed with water.
- Application is to be repeated for 3 consecutive days.

Packing:

Bottles of 60 ml.
