

STELLAMIDE tablets

Spasmolytic & Tranquillizer

Composition:

Each tablet contains:

- Trifluoperazine Hydrochloride eq. to 1 mg trifluoperazine base.
- Isopropamide Iodide eq. to 5 mg isopropamide ion.

Properties:

Stellamide , One of the most effective combination, provides an optimal & rapid relief in painful conditions associated with visceral spasm. The excellent, well tolerated, anti - emetic effect of trifluoperazine is combined with the potent, quaternary ammonium antimuscarinic effect of the Isopropamide iodide. Stellamide provides rapid stabilization of the visceromotor function. Because both [trifluoperazine & Isopropamide] are long acting, twice daily doses are recommended.

Indications:

Gastro - intestinal disorders, gastric & duodenal ulcer, gastroduodenitis, hypersecretion&hypermotility of gastrointestinal tract, nervous dyspepsia, biliary dyskinesia, irritable & spastic colon, colitis, diarrhoea, ureteric spasm, nocturnal enuresis & dysmenorrhoea.

Dosage:

Two or three tablets / day.

Packing:

Box of one strip x 10 tablets.
