

# VIODERM HYDROCORTISONE Skin Cream

Anti-inflammatory-Antiallergic – Antiseptic.

## Composition:

- Hydrocortisone Acetate 1 % .
- Iodochlorhydroxyquin 3 % .

## Properties:

VIODERM HYDROCORTISONE combines the anti-inflammatory, antiallergic and antipruritic properties of Hydrocortisone plus the antibacterial, antifungal action of Iodochlorhydroxyquin.

## Indications & Usage:

Steroid responsive skin conditions e.g. :  
eczema, neurodermatitis, seborrhoeic dermatitis, discoid lupus erythematosus, psoriasis (specially acute forms where tar is contraindicated), intertrigo, infantile eczema, napkin's dermatitis, irritation by detergents, chemicals, radiation, etc; insect bites, anogenital pruritus.

**N.B:** In presence of infection, treatment must be supplemented with the appropriate systemic antimicrobial agent.

## Dosage & Administration:

" The cream is to be applied as a thin film over the lesion "

- Adults: 2-3 times daily
- Children: 1-2 times daily

(More applications do not enhance therapeutic effect)

**N.B.:** Gradual withdrawal of treatment is always recommended.

## Packing:
