

ZINCOMYCIN Eye Drops

(Antibacterial-Astringent)

Composition:

- Gentamycin Sulphate equivalent to Gentamycin base 0.3 % w/v.
- Zinc Sulphate 0.25% w/v.

Properties:

Zincomycin is an aqueous sterile solution for ophthalmic use. The active principles of Zincomycin eye drops are:

- 1 - Gentamycin sulphate, a water soluble antibiotic of the aminoglycoside group active against a wide variety of pathogenic gram-positive and gram-negative bacteria.
- 2 - Zinc Sulphate, having antibacterial and astringent actions.

Action:

Zincomycin eye drops is highly effective against infections caused by susceptible strains of bacteria including *Pseudomonas aeruginosa*, *Proteus* sp., *Nisseria*, gonorrhoeae, *Escherichia coli*, *Klebsiella* sp. and *Enterobacter Staphylococcus* (including certain strains that are resistant to other antibiotics).

Usage & Indications:

1- Zincomycin eye drops is indicated for the topical treatment of the infections of the external eye caused by bacteria susceptible to Gentamycin such as:

Belpharitis - Keratitis - Corneal ulcers - Dacryocystitis and Keratoconjunctivitis.

2- Zincomycin eye drops is also used as a prophylactic in cases of trauma to the eye and pre /post-operations.

Dosage & Administration:

Instill 1-2 drops in the affected eye every 4 hours.

Packing:

Plastic dropper bottle of 10 ml.
