

RUTA C 60 Tablets

Composition:

Each tablet contains:

- Rutin 60 mg.
- Ascorbic Acid 160 mg.

Properties:

Rutin is concerned with the maintenance of the normal conditions in the wall of the small blood vessels and capillaries. This is followed by increase in the capillary resistance. It potentiates the action of Ascorbic Acid in this respect. Ruta C 60 is therefore a very active combination of two essential factors acting synergetically for the treatment of capillary fragility and prevention of accidents which may entail.

Indications & Usage:

Increased capillary fragility and decreased capillary resistance as in arteriosclerotic hypertension to guard against cerebral haemorrhage other capillary haemorrhagic complications, haematuria, diabetic retinitis. Increased capillary permeability as in allergic diseases and petechial haemorrhage.

Dosage & Administration:

One tablet 3 times daily or more as directed by the physician.

Packing:

- Boxes of 20 tablets (2 strips X 10 tablets).
- Boxes of 1000 tablets (100 strips X 10 tablets).
